QDev Philosophy

THE BELIEFS THAT GUIDE OUR ACTIONS

TODAY, AND TOMORROW

Vision

To help people transform their businesses and accelerate revenue generation through contemporary technological solutions.

Mission

Boost client collaboration, engage with technology partners and foster a growth-minded workplace culture for people through our human-centric approach.

Core values

Be you.

We believe and appreciate uniqueness.

Be creative.

We never stop imagining, innovating & inspiring.

Be determined.

We only stop once we've achieved our goal.

Our Services

WE'VE FOUND OUR CALLING IN DESIGNING, DEVELOPING AND TESTING

Custom Web Applications

We develop customized, interactive and intelligent user interfaces that are compatible with both Android and iOS.

Product Development

Fueled by design, driven by data – we develop products that provide a phenomenal customer experience.

Offshore Development

Offering you a dedicated Offshore Software Development Team for your projects and closing the talent gap.

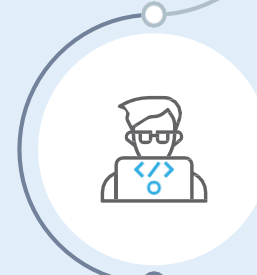

Custom ERP

An ERP solution built through intuitive learning, loaded with customizable features to address your business needs.

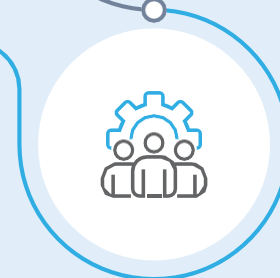

Dedicated Development

Providing mindful guidance and multiple domain expertise in the technical realm to make you market ready.

Staff Augmentation

Augmenting your organizational capacity with the best in the field as and when the need arises.

A GLIMPSE OF SOME SUCCESSFUL PROJECTS ACROSS DOMAINS

Completed projects

FARMING SYSTEM

About the app:

An application for farming industry that helps with brand recognition and safety processes. With admin, grower and other role-based users and functionalities for managing stock, sales, machine, depot and attendance, and the geometry for the farm boundary, the app was a game-changer.

Technologies:

Java11, Spring MVC, MyBatis, Spring ZK framework, ArcGIS Map, MySQL, PostgreSQL, Payment Gateway Integration (PayPal), Jasper Report, Apache POI

GUNROOM SYSTEM

About the app:

An application created for the buyers and sellers of guns. It empowers a dealer to manage multiple guns at a time along with their statuses. Deals can feed data into the app from his own site or other social sites. The app comprised modules like admin, dealer portal, website, etc.

Technologies:

Java, J2EE, Spring MVC, Hibernate, Spring REST, JSP & Servlet, Payment Gateway Integration(Sage Pay), HTML, Bootstrap, jQuery, JavaScript, MySQL

A GLIMPSE OF SOME SUCCESSFUL PROJECTS ACROSS DOMAINS

Completed projects

CATERING SYSTEM

About the app:

It is a cloud-based software system for managing caterers' business. It provides functionality of menu preparation, Raw material Allocation, Menu Allocation, Labours management, Per dish calculation and many more. This app is developed to maintain customers' orders and functions, they can order all the types of ingredients as per selected item and it is very useful for all types of caterers.

Technologies:

Java 17, Spring Boot, Angular, MySQL, REST API, AWS

HEALTHCARE APP

About the app:

This system is designed for healthcare professionals and organizations. The app supports patient records management, appointment scheduling, billing and prescription management, with a focus on improving healthcare delivery efficiency and ensuring compliance with healthcare regulations.

Technologies:

Java, Spring, Spring Boot, Hibernate, JPA, JSP, AngularJS, HTML, CSS, MySQL, Docker, RESTful APIs, FHIR standards for healthcare data exchange

Completed projects

REAL ESTATE PORTAL

About the app:

A portal allowing home owners to sell or rent their home, studio or the property. It also lets the users take a virtual tour of a property and check the floor plan. Home owners can also feed data easily from one portal to another portal.

Technologies:

Java, Spring MVC, Hibernate, JSP & Servlet, HTML, Bootstrap, jQuery, JavaScript, MySQL

HARAJ EXPRESS

About the app:

This application is developed for online auctions of products. With a role-based system, the app makes it super easy for sellers to list their items and buyer to purchase them.

Technologies:

Java, Spring Boot, JPA, Elastic Search, MySQL

A GLIMPSE OF SOME SUCCESSFUL PROJECTS ACROSS DOMAINS

Completed projects

LEGAL APP

About the app:

An app specifically designed for advocates where users can add proposals in the portal and advocates can bid on it. The app is managed according to the location. It also allows users to chat with the advocates.

Technologies:

Java, Spring Boot, JPA, Microservices, GAE, PostgreSQL

LOAN MANAGEMENT APP

About the app:

This App is designed to manage user loan details efficiently. It serves as a back-office solution to maintain all user legal documents and information, enabling effective tracking of user records. The application allows for easy management of user information, including loan initiation dates, active loans, and pending loans, as well as tracking the timeline of loan activities.

Technologies:

Java 11, Spring Boot 2.5.6, Hibernate, PostgreSQL, AWS S3, AWS EC2, Azure DevOps, HTML, CSS, JavaScript

A GLIMPSE OF SOME SUCCESSFUL PROJECTS ACROSS DOMAINS

Completed projects

BLOOD SAFETY INFORMATION SYSTEM

About the app:

The Blood Safety Information System (BSIS) is an open-source information system designed to manage donor and blood safety information from the point of donor registration to donation collection, through to laboratory testing, component processing and labelling, storage, and distribution to hospitals and clinics.

Technologies:

Java 8, Spring, AngularJS, MySQL, ZPL

VIRTUAL MEETING SYSTEM

About the app:

The system enables users to seamlessly add, and assign meetings. View meetings through an intuitive calendar dashboard. We helped in enhancing system security by working on Spring Security, SSO login, and OAuth2 Authentication. Worked on on-premise ADDS (Active Directory Domain services) to make on-premise domain and its user. Setting up on-premise ADFS (Active Directory Federation Services) for SSO login. Setting up an on-premise Exchange server for Calendar service.

Technologies:

Java 17, Spring Boot, Spring Security, MS SQL Server, OAuth2, SSO

.NET BANKING MANAGEMENT APPLICATION

About the app:

A banking application through which bank employees can generate customer statements (customizable format) and email it to the customers. It also allows scheduling for statement generation, generating millions of statements simultaneously. The app is capable of automatic data bifurcation and can save data in product database.

Technologies:

.Net Core (API), Microservices, Angular, SQL Server, SSIS Packages, PDF conversation tool

.NET MEDICAL BILLING SERVICE

About the app:

The app is a cost-effective solution to reduce claim rejection rate and increase cash flow, so more time to be invested in patient care. The app's multi tier architecture integrates various functions of a healthcare provider's medical office, including patient scheduling, billing, claims processing, accounts receivable management, and collection.

Technologies:

.Net MVC, Web API, HTML, CSS, jQuery, SQL Server, Windows service, CI/CD Pipeline, Azure DevOps

Completed projects

.NET CONSTRUCTION ERP & MANAGEMENT

About the app:

This app is useful for huge construction business and helps take the business towards automation. It fetches the details of an order, construction parts, delivery of parts, and notifies the customers with notifications. It also generates reports in multiple languages.

Technologies:

.NET Core, Web API, Angular, Azure functions, Logic apps, Azure Cosmos DB, CI/CD Pipeline, Azure DevOps

.NET DATA MANAGEMENT APPLICATION

About the app:

This application enables custom operations on printer data. Through Azure functions and logic apps, triggered based on HTTP requests and time, the app fetches data from queue or third-party APIs, and insert it into database. The app is capable of multiple validations and calculations to manipulate the data.

Technologies:

.Net Core, Azure functions, SQL Server, Logic apps, CI/CD Pipeline, Azure DevOps

A GLIMPSE OF SOME SUCCESSFUL PROJECTS ACROSS DOMAINS

Completed projects

.NET

E-COMMERCE APPLICATION

About the app:

The app helps comparing products. When a user searches for any product, the app provides multiple shop options with product features and prices, making it very easy for the customer to make a decision.

Technologies:

.Net MVC, HTML, CSS, jQuery, Azure CosmosDB, Web API, Third-party tools integration, PostgreSQL, CI/CD Pipeline

.NET

STOCK MANAGEMENT

About the app:

The Stock Management portal deals with weighted stock market of Hong Kong which is called as Hang Seng. Its Stock Query fetches live data from various data points of the stock market and displays it in a way that helps market agencies take business decisions. The data can be exported to excel and users can set indicators for notification.

Technologies:

.Net MVC, HTML, CSS, jQuery, SQL Server

A GLIMPSE OF SOME SUCCESSFUL PROJECTS ACROSS DOMAINS

Completed projects

AGRICULTURE MANAGEMENT AND SCANNING SYSTEM

About the app:

An application allowing the farmers to use electronic tags to move from mob-based averages to individual animal management. It enables reading of multiple animals simultaneously for quick & accurate counting. It's a low-cost, high performance alternative to current technologies.

Technologies:

Node JS, EJS, CSS, SQLite, Socket IO, Angular

MODERN COLIVING SOLUTION

About the app:

A co-living solution app that connects young adults looking for affordable living with elderly landlords willing to rent out for meaningful company. The app allowing listing, addition of services needed, lease signing, payments, etc.

Technologies:

Node JS, MongoDB, Angular Material
